Status Report

Project	
Date:	7/24/2022
Contact:	Lizzy Schmitz
Prepared By:	Lizzy Schmitz

Status: (Red/Yellow/Green)	
Overall Status:	Green
Explanation:	Overall green as key milestones were completed and outstanding key issues are rated as "low" and not gating to move to next phase.

Key Accomplishments

Learned how to use Snowflake to create a database, datawarehouse, and successfully create and load staging tables

Started refresh on key SQL code that will be needed for current and future modules (ex-how to create tables, truncate, view data, etc.)

Made progress on key open issues, and resolved one.

ID #	Key Issues	Action Plan	Status
1	Received error when loading data into	Performed troubleshooting to determine it was an issue with how	Resolved
2	Additional Fact tables will be needed	Will revisit ERD and feedback, and make updates as needed ahead of Fact table creation in Snowflake	In Progress
3	Not all CSV files have complete data sets, including for key data points	Complete data sets with all required data ahead of ETL stage of project	In Progress
4	Microsoft Azure Blog is unavailable	Used CSVs to load tables, but created stages with Azure blog links to update when service resumes	Open

Critical Milestones	Health	Due Date	Comment/Status
Completed project status update	G	7/24/2022	Complete
Created Snowflake database and loaded data	G	7/24/2022	Complete
Staging tables created and loaded	G	7/24/2022	Complete
Complete Module 6 & 7 (to be ahead, and stay ahead while traveling)	G	7/31/2022	In Progress
